

GROW DURING THE WINTER WITH GREEN CITY GROWER'S COLD FRAMES AND WINTER MAINTENANCE

Cold Frames are like mini-greenhouses that fit on top of your raised-beds or can be placed directly on the ground, trapping heat from the sun to maintain a warmer environment for your vegetable crop. During the winter, temperatures inside the Cold Frame can be up to 40 degrees warmer than outside! With cold frame technology, you can extend your growing season into the late fall and early spring, with the potential to harvest year-round.

Cold Frames: \$350 per 4'x4'
\$650 per 4'x8'

Winter Maintenance: 1/2 price
maintenance for Winter months
(December-February)

*Cold Frames are a one-time investment, and can be used year after year for over-wintering. Green City Growers offers a 2-year warrantee on all Cold Frame repairs for our maintenance clients.

Your Growing Season:

Without Cold Frames: April-November (8 months)

With Cold Frames: March-December (10 Months, 2 more months of harvesting!)
